

Microsoft ADC Cybersecurity Skilling Program

Week 4 Assignment

SC-900 Learning Path

Student Name: ALEX EVANS NJIRU MBOGO

Student ID: ADC-CSS02-25064

Introduction

This week i completing the third section of the SC-900 Learning Path available

Tasks Completed

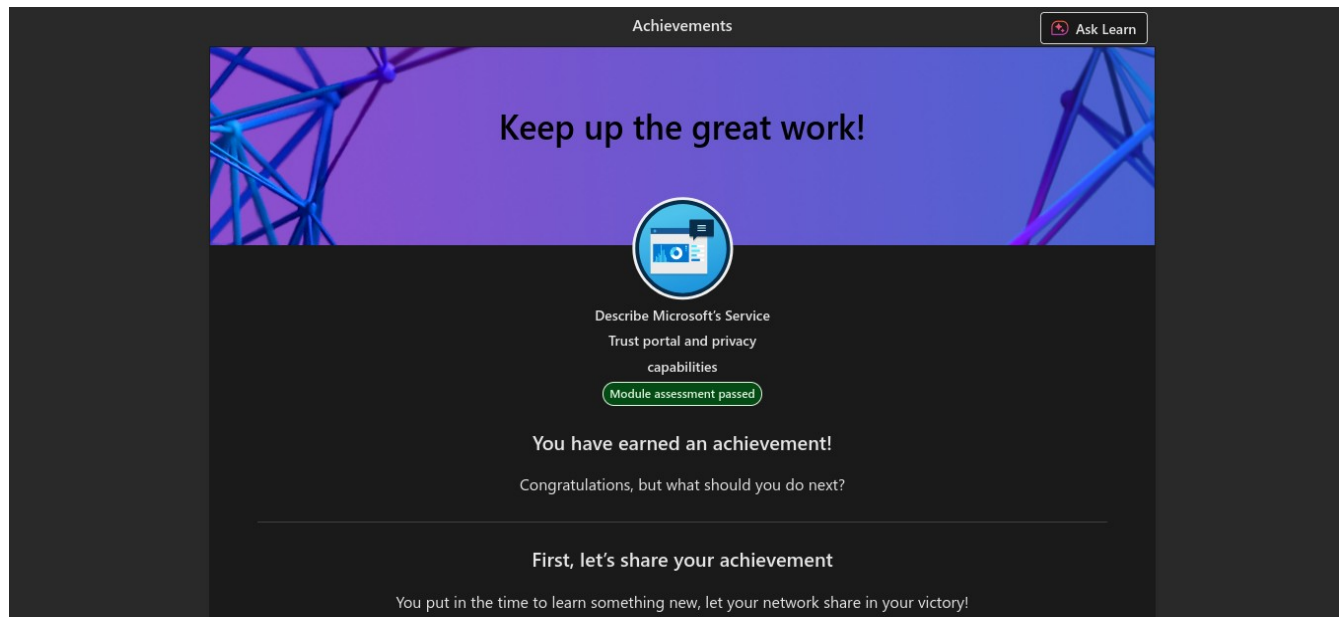

In this unit I completed this module:

1. Describe Microsoft's Service Trust portal and privacy capabilities
2. Describe the compliance management capabilities in Microsoft Purview
3. Describe information protection, data lifecycle management, and data governance capabilities in Microsoft Purview
4. Describe the insider risk capabilities in Microsoft Purview
5. Describe the eDiscovery and Audit capabilities in Microsoft Purview

Describe Microsoft's Service Trust portal and privacy capabilities

In this module, I learned about the Microsoft Service Trust Portal and the variety of content resources it provides about Microsoft security, privacy, and compliance practices. I learned about Microsoft's commitment to privacy and its privacy principles.

Describe the data compliance solutions of Microsoft Purview and the eDiscovery and Audit capabilities in Microsoft Purview

In this module I learned how Microsoft Purview Data Compliance solutions help you manage and monitor your data, minimize compliance risks, and meet regulatory requirements.

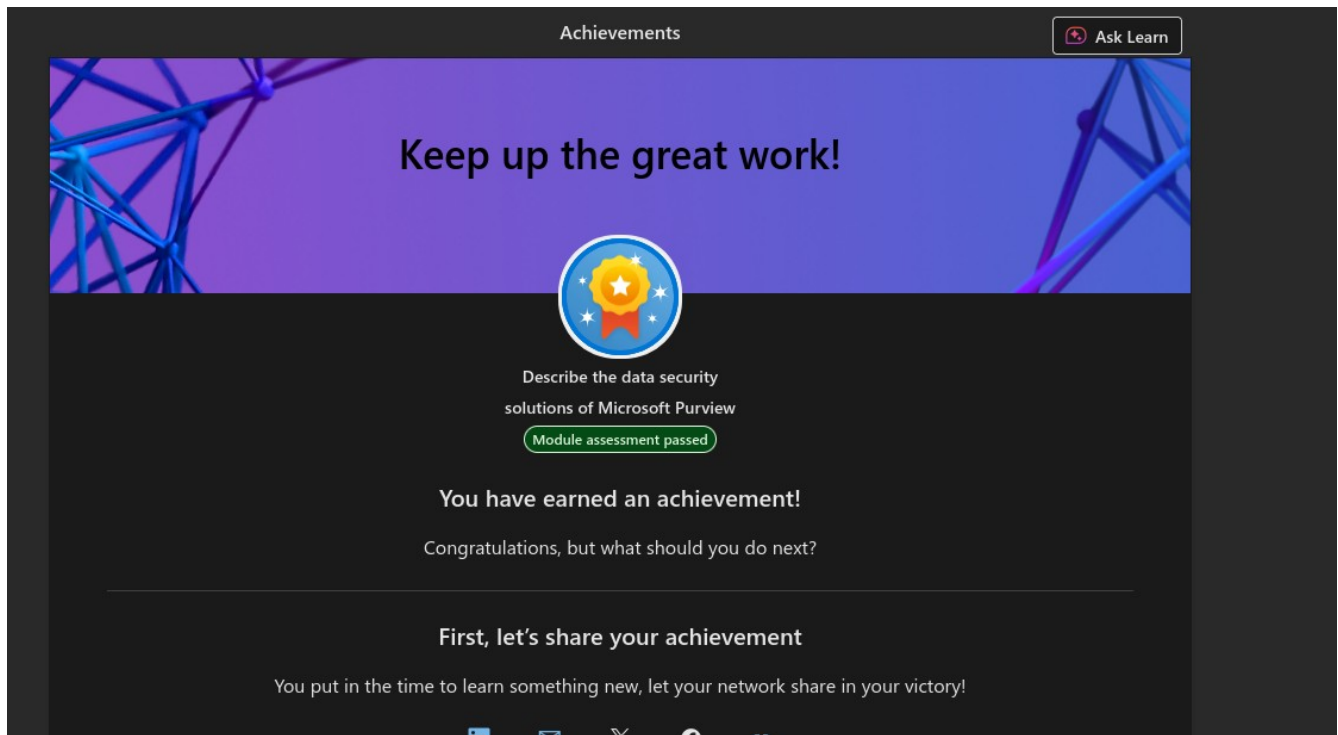

1. The module covered auditing solutions offered by Purview, including Audit (Standard) and Audit (Premium),
2. The electronic discovery (eDiscovery), a process used to identify and deliver electronic information as evidence in legal cases.
3. The Purview Compliance Manager, a tool designed to assist in managing compliance across multicloud environments,
4. Purview Communication Compliance, an insider risk solution that aids in detecting, capturing, and addressing potentially inappropriate messages within an organization.
5. Lastly, the Purview Data Lifecycle Management and Microsoft Purview Records Management, which offer tools for retaining necessary content and deleting unnecessary ones, and managing regulatory, legal, and business-critical records respectively.

Describe the data security solutions of Microsoft Purview

- I learned how Microsoft Purview Information Protection helps organizations discover, classify, and protect sensitive information.
- I learned how Microsoft Purview Data Loss Prevention helps organizations prevent their users from inappropriately sharing sensitive data with people who shouldn't have it.
- I learned how Microsoft Purview Insider Risk Management helps minimize internal risks.

Microsoft Purview data security solutions.

In this module I learned how Microsoft Purview Data Security offers a comprehensive approach to safeguarding organization's data across its entire life-cycle. By integrating solutions such as:

- Data Loss Prevention,
- Insider Risk Management capabilities in Microsoft Purview,
- Information Protection,

Microsoft Purview ensures that sensitive data is protected from unauthorized access and misuse. This integrated approach helps organizations manage critical risks and comply with regulatory requirements, providing end-to-end protection for data wherever it resides.

Summary

I gained an understanding of how organizations can utilize Ai and machine learning to automate

- Data loss prevention
- insider risk management
- And Adaptive protection in Microsoft purview
- Adaptive protection in Data loss prevention

This automation helps organization automate their response to threat.
